

EDMS'S STORY

Founded in 1995, EDMS has gone through many changes and considerable maturation to become the client-driven company we are today. With all the changes, one key feature has remained the same – our commitment to reducing the administrative burden of education data management while providing industry-leading customer service.

FLAT-FEE PRICING

Because the 504 process is extremely fluid for districts, we wanted to simplify the pricing process. Regardless of the length of a child's plan, how the child's process is managed, or how many users or students you have in your account, you pay one flat fee.

À la Carte Options

We know that every district has their own style and needs. We have a wide variety of customization options that we can offer. Just let us know what you are looking to accomplish!

"More time for our kids"

CUSTOM FIT

EDMS has worked closely with DrummondWoodsum to automate their most recent set of 504 forms into our database.

We also understand that each district has a unique program that they want to retain even when adding a new process.

We will work with you as a team to make sure the account fits your district. This may include standard updates or a customization package that will fit your needs and your budget.

Call today to start a custom quote!
