

## EDMS'S STORY

Founded in 1995, EDMS has gone through many changes and considerable maturation to become the client-driven company we are today. With all the changes, one key feature has remained the same – our commitment to reducing the administrative burden of education data management while providing industry-leading customer service.

## TIERED PRICING

### Basic Tier

Great for districts with a strong understanding of Policy, but in need of an automated process to reduce time spent on billing while still providing some tracking and documentation consistency and reimbursement maximization assistance.

### Classic Tier

This is the level of service that you have heard others talk about! Lots of bells and whistles to help your team maximize both compliance and reimbursements. This tier also provides Policy training and support and basic audit support.

### Pro Tier

This is for the district that wants all the bells and whistles, likes to have a highly customized experience, and wants the comfort of knowing EDMS fully supports them during an audit.

### À la Carte Options

Some of the features included in the Pro and Classic tiers can also be added to accounts for an additional fee.

Pick a tier that works for you today, and know that you can adjust later if you need!

- ◆ Initial data imports

"More time for our kids"

## CUSTOM FIT

EDMS has invested considerable time working with various stakeholders – district and state representatives – to construct a robust library of guidance documents to accompany many of the required forms for Policy compliance.

We also understand that each district has a unique program that they want to retain even when adding a new process.

We will work with you as a team to make sure the account fits your district. This may include standard updates or a customization package that will fit your needs and your budget.
